

## **2020 Environmental Policy**

**Our vision is to be recognised for our positive commitment to providing the highest levels of protection, conservation and enhancement of the Environment**

We will:

- Strive to reduce our environmental impacts associated with all of our undertakings.
- Ensure that we and our suppliers follow legal and best practice requirements for procurement and the use of sustainable materials.
- Comply with all required legislation, relevant standards and statutes, with the aim of preventing pollution and Environmental damage.
- Establish an integrated management system for managing Environmental aspects and impacts, which align to the requirements of industry recognised standards.
- Adopt best practice in Environmental management and assessment whilst incorporating the principles of sustainability into our operations.
- Achieve continual improvement by monitoring Environmental performance, including progress against objectives and targets.
- Communicate our commitment to Environmental improvement to all those involved in our work activities, including suppliers, through training and raising Environmental awareness.

***“We take our responsibility seriously to protect the natural Environment. To that end, the Environment is given paramount consideration in all of our business activities.”***

***Tracey Vasko – Director***
